PROFESSIONAL SUMMARY

Versatile **Software Engineer & DevOps Specialist** with extensive experience delivering end-to-end enterprise applications and backend services. Proficient across application architecture, API engineering, database design, containerized deployments, CI/CD automation, and high-availability operations. Proven expertise building **.NET 10 / Blazor Interactive Server** applications, **Node.js/Express APIs**, **Angular** frontends, microservices, and database-driven systems. Experienced operating in banking and high-concurrency enterprise environments, seamlessly navigating the software lifecycle from initial development and automated testing through deployment, optimization, and production support.

CORE COMPETENCIES

End-to-End & Backend Engineering

Application Architecture, .NET 10, Blazor Interactive Server, Node.js, Express, REST/SOAP APIs, Microservices, Full-Stack Development

DevOps & Infrastructure

Docker, Kubernetes, Docker Swarm, Linux (RHEL, Ubuntu), CI/CD Pipelines, SuperDevOps Tools, Server Automation, High Availability

Databases & Platforms

PostgreSQL (PGPool, REPMGR), MS SQL Server, MySQL, MongoDB, Elasticsearch, OpenSearch, SQL Optimization

Quality & Automation

Cypress, Python Automated Testing, GitHub Actions, GitLab CI/CD, Jenkins, Shell Scripting, Regression Testing

PROFESSIONAL EXPERIENCE

Philippine Savings Bank (PSBank)

April 2026 – Present | Metro Manila, PH

DevOps Engineer / Junior Assistant Manager

- SuperDevOps Platform Engineering:** Lead the end-to-end design and development of the enterprise **SuperDevOps Tool** built on **.NET 10** and **Blazor Interactive Server**, streamlining internal infrastructure workflows, automated releases, and system orchestration.
- Enterprise Banking Infrastructure:** Direct the deployment, operational maintenance, and high-availability support for mission-critical enterprise banking applications and server infrastructure.
- Production & Incident Management:** Rapidly diagnose and resolve complex multi-tier issues across application code, Linux servers, containerized workloads, networking, and clustered databases to ensure strict SLAs.
- Cross-Functional Collaboration:** Partner closely with development, cybersecurity, and IT operations teams to streamline application release cycles and security compliance.
- Operational Automation:** Architect server-side automation scripts, custom management tools, and CI/CD enhancements aimed at eliminating manual deployment overhead and lowering production risk.

OneTool Solutions PH

September 2023 – April 2026 | Philippines

End-to-End Software Engineer

- Full-Lifecycle Delivery:** Spearheaded complete application development cycles, building enterprise services using **Node.js**, **Express**, **.NET**, **Angular**, and **MS SQL Server**.
- Container Orchestration:** Configured and maintained production container workloads using **Docker** and **Kubernetes**, improving application deployment speed and scalability.
- High-Availability Clustering:** Administered and monitored critical high-availability database clusters including **PostgreSQL/PGPool**, **REPMGR**, **MySQL clusters**, **MongoDB**, and **Elasticsearch/ELK**.
- CI/CD & Server Automation:** Built automated deployment workflows using **GitHub Actions**, **GitLab CI/CD**, and **Jenkins**; engineered cron jobs and shell scripts for automated maintenance.
- Multi-Layer Troubleshooting:** Performed root-cause diagnosis across operating systems (RHEL/Ubuntu), API gateways, database locks, and application code.

Backend Developer / Engineer — ATM Microservices

- **Financial Microservices:** Architected high-throughput **Node.js microservices** to process backend transactions for enterprise ATM switch systems.
- **API Integration & Reliability:** Implemented robust REST and SOAP integrations verified through Postman and SoapUI, ensuring zero transactional drop-off.

Full-Stack Developer — Employee Reward & BIR Liquidation Systems

- **Enterprise Web Applications:** Authored responsive frontend interfaces in **Angular & TypeScript** integrated with **Node.js/Express** APIs and **MS SQL Server**.
- **Compliance Systems:** Successfully delivered the internal Employee Reward System and official BIR Liquidation System aligned with corporate financial workflows.

Achieve Without Borders Inc.

December 2022 – February 2023 | Philippines

Quality Engineer Intern

- **QA & Test Execution:** Designed and executed functional, manual, and regression test suites to systematically eliminate critical software bugs prior to production releases.
- **Automated Testing:** Assisted engineering teams in diagnosing software defect root causes and introduced automated testing modules.

TECHNICAL SKILLS

Languages	C#, TypeScript, JavaScript, Python, PHP, Java, C++, SQL, HTML5, CSS3
Frameworks & Web	.NET 10, ASP.NET Core API, Blazor Interactive Server / WebAssembly, Node.js, Express.js, Angular, React
Databases & Storage	PostgreSQL, PGPool, REPMGR, MS SQL Server, MySQL, MongoDB, Elasticsearch, OpenSearch
DevOps & Cloud	Docker, Kubernetes, Docker Swarm, GitHub Actions, GitLab CI/CD, Jenkins, Linux (RHEL, Ubuntu), AWS EC2, Shell Scripting
APIs & Testing	REST, SOAP, Postman, Insomnia, SoapUI, Cypress, Python Automated Testing Module (PATM)
Version Control	Git, GitHub, GitLab, SVN

EDUCATION

Bachelor of Science in Computer Science	June 2019 – July 2023
National University – Laguna	
Senior High School – Information and Communications Technology (ICT)	June 2017 – April 2019
STI College Calamba	

ADDITIONAL HIGHLIGHTS

- **Full-Stack & Infrastructure Versatility:** Seamlessly bridges the gap between modern .NET / Blazor software development, database administration, QA testing, and DevOps automation.
- **Domain Expertise:** Proven experience in highly regulated financial and enterprise environments (banking systems, ATM switch networks, SuperDevOps tooling, liquidation platforms).
- **Hackathon Recognition:** Honored through global and national hackathon awards for rapid solution engineering, analytical thinking, and high-pressure problem solving.
